

Homework 0: Python Review

Authors: Arshi (2018s), Sana (2017f), Alex (2017s)

Due date: Tuesday Jan 23 2018, before lecture.

In this homework you will complete a couple of simple exercises in order to show your understanding with Python. If these exercises are challenging or new to you, you may want to reconsider taking the class and/or brush up on your Python skills.

For the following exercises you are not allowed to use any Python packages (i.e. Numpy, Pandas, etc.).

Lists

Create an empty Python list called 'a' in the cell below.

```
In [1]: a=list();a
```

```
Out[1]: []
```

Store all values between 1-100 (inclusive) with increments of 3 (i.e. 1, 4, 7...) in 'a'.
